### **DETAILED ACTION**

This Office Action is in response to amendments and remarks filed January 8, 2004. Claims 1-36 are currently pending.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 35 and 36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It appears that Applicant has failed to disclose an embodiment in which the modulation photogate and the accumulation gate are the same photogate. Examiner reminds Applicant that no new matter may be added.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7, 8, 10-16, 20, 32, 33, 35 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 7, it is unclear in its given context how the modulation is related to the rest of the invention.

Regarding claims 8, 10-12, 20, the term “preferably” or “possibly” is indefinite since it is unclear if the limitation following it is in the claimed invention or not.

Regarding claim 13, “the pixel brightness” lacks proper antecedent basis.

Regarding claim 14, “the case of background lighting”, “the difference of grey value images” and “the modulated lighting” lacks proper antecedent basis.

Furthermore, it is unclear in its given context what “used as a correction parameter on the one hand when the modulated lighting is switched on and on the other hand when the modulated lighting is switched off” means.

Regarding claim 15, it is unclear in its given context how the elements are related to the rest of the invention.

Regarding claim 16, “the intensity-modulated electromagnetic wave”, “the other phases and brightness results” and “the transmitter” lacks proper antecedent basis.

Regarding claims 32 and 33, “the difference signals, sum signals and associated reference signals” lacks proper antecedent basis. Further, it is unclear what the reference signals are associated with.

Regarding claims 35 and 36, it is unclear how the limitations of claims 1 and 30 would be affected if the modulation photogate and the accumulation gate are the same photogate, as different voltages are applied to the modulation photogate and the accumulation gate.

#### ***Allowable Subject Matter***

5. Claims 1-6,9,17-19,21-31 and 34 are allowed over the prior art of record.
6. The other claims would be allowable once the 112 matters have been resolved.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
